# An environmentally-friendly product

By choosing the ROOMZ solution, you are you are opting for sustainable digital technology. Our products are designed to consume as little energy as possible and to have a long service life, providing you with a high level of autonomy.

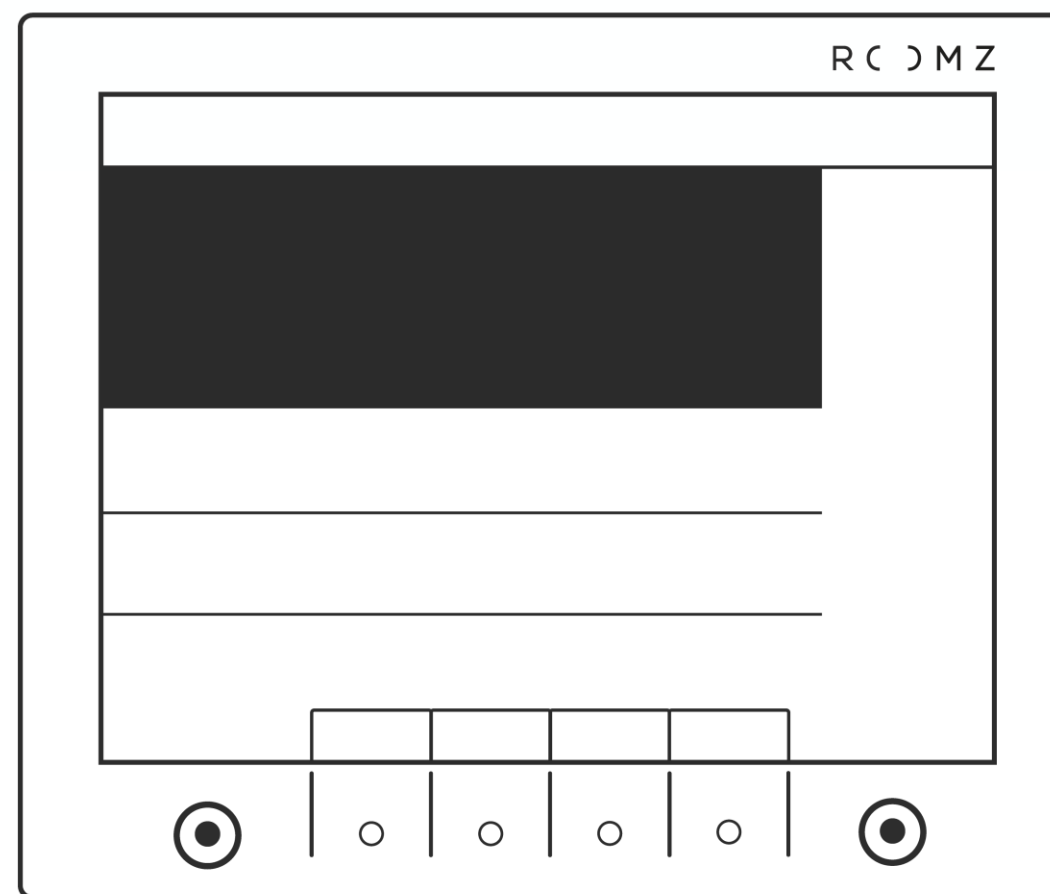

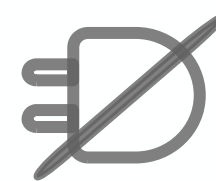

**Consumption**  
Consumes 10,000 times less  
than a standard tablet

**Durability**  
10 to 20 years of  
product life

**Wireless**  
No polluting installation  
work needed

**Battery life**  
Battery autonomy with  
a typical usage: 4 years  
for the ROOMZ Display

**Eco-friendly production**  
Assembled in Switzerland  
No toxic components

**Design**  
Simple black and  
white design

# Wired solution vs. ROOMZ

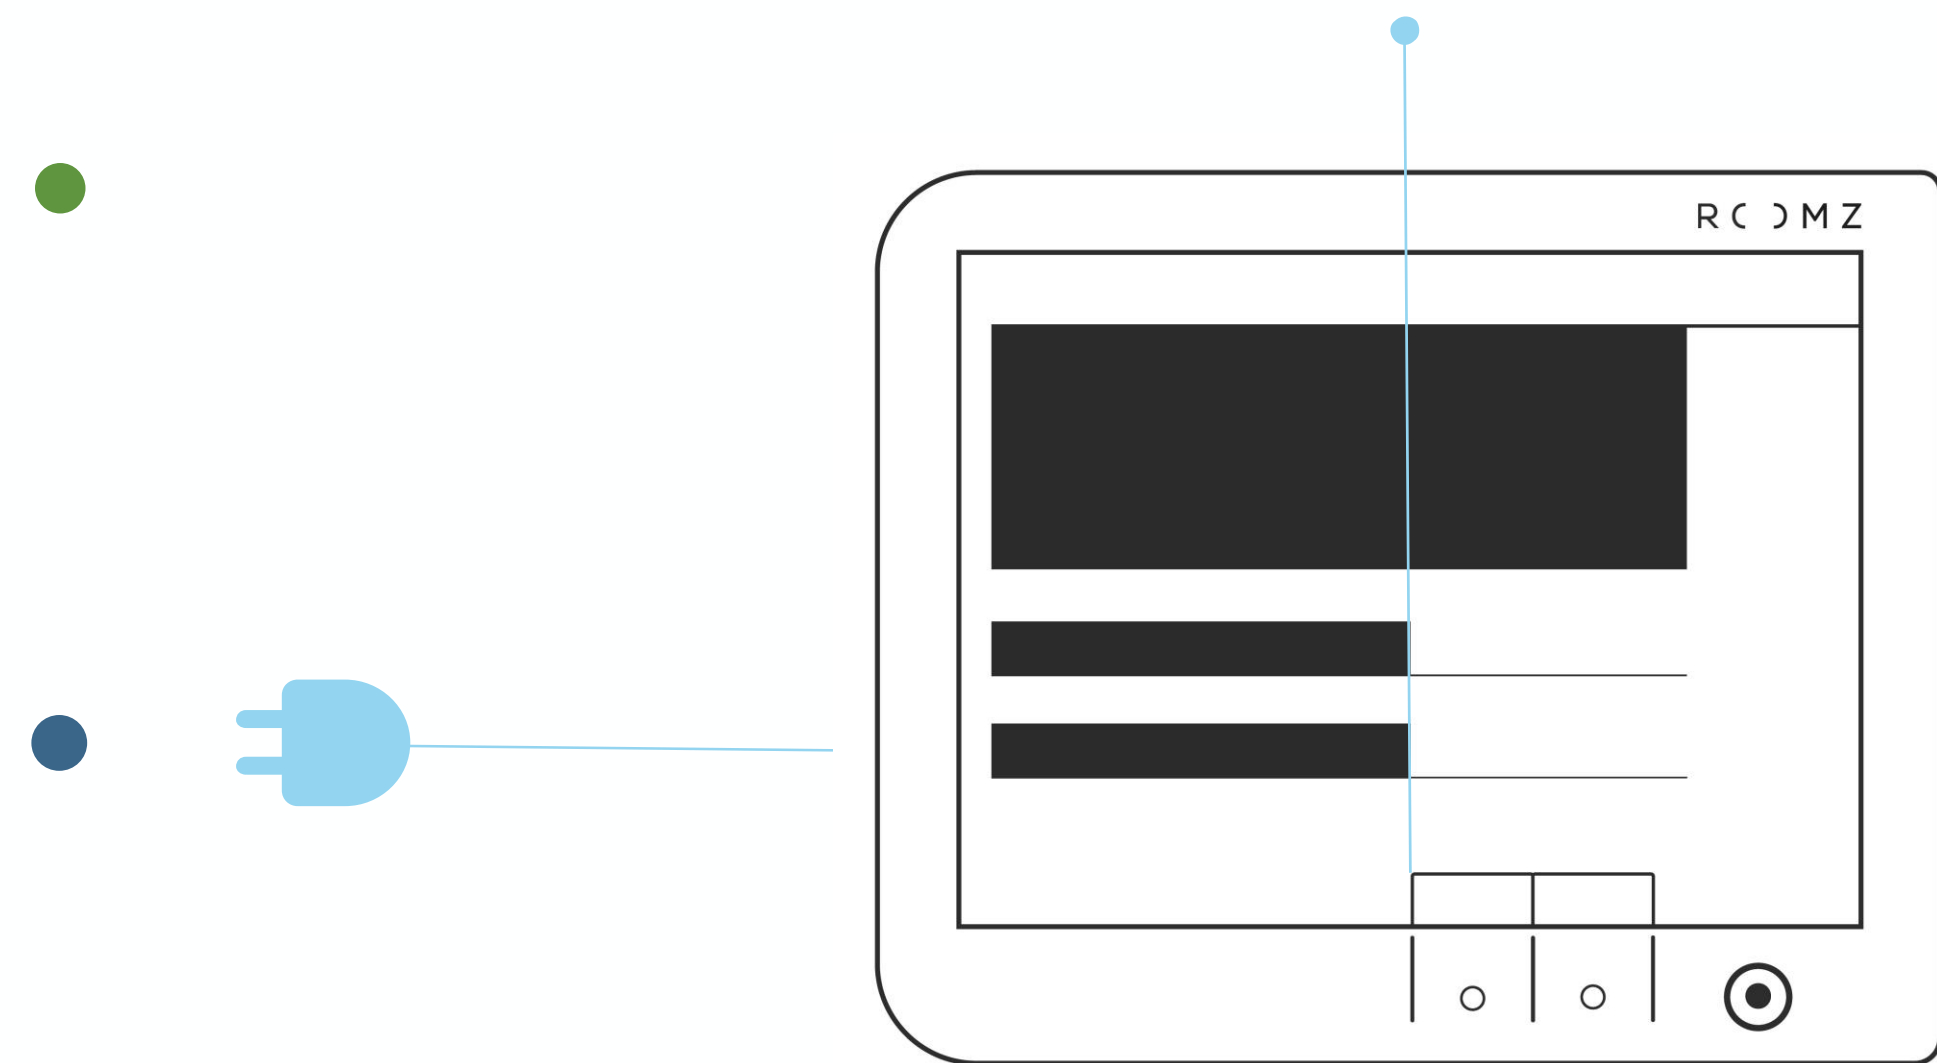

Evaluation of the total carbon footprint of a ROOMZ Display compared with a wired solution over a period of 8 years:

- **Production and transport:** Similar consumption for both solutions: 59 kg of CO<sub>2</sub>  
However, the lifespan of a wired solution is estimated at 4 years

**Use**  
43 kg every 4 years

**Recycling**  
Evaluated at 1 kg per composition

**Total over 8 years**  
205 kg CO<sub>2</sub>

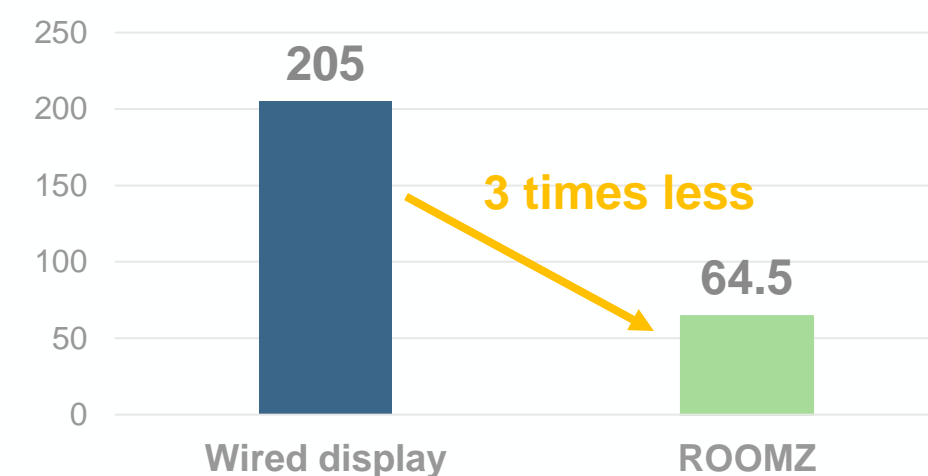

● **Use**  
0,0002 kg every 4 years

● **Recycling**  
The majority of components can be recycled: 0.5 kg

● **Battery**  
Battery replaced after 4 years: 5 kg

● **Total over 8 years**  
64.5 kg of CO<sub>2</sub>

# And in concrete terms?

100 ROOMZ Displays operating for 8 years result in 14,050 kg of CO<sub>2</sub> saved compared to a wired solution.  
That is equivalent to:
